GREAT MEDICAL DISCOVERY! With such testimony, no stronger proof can be given, unless it be trial of this wenderful Hampton's Vegetable Tincture.

Let the afflicted read! read!

BARRELIVILE, ALLEGANY COUNTY, (Md.,)
May 4, 1862.

May 4, 1862.

Dran Sins: In justice to Dr. Hampton's Vegetable Tincture, I wish to loform you that I was taken sick on the 3d day of January last, with an affection of the stomach, bowdles, and kiduays. I was attended by four emineut physicians for more than two months—all to little or no effect. Had some knowledge of the great virtue in Hampton's Tincture from one bottle which my wife had taken two years

ture from one bottle which my wife had taken two years since.

I came to the conclusion that I would take no more medicine from my physiciaus, but try the Tincture; and I am happy to inform you I had not taken it two days before I fell its powerful influence upon my stomach. I have continued using the Tincture, and am now able to leave my room, and can eat any common diet without much inconvenience or pressure on my stomach.

The afflicted or their friends are daily visiting me, to learn of the great virtue there is in this Tincture of Hampton's.

I expect to send you several certificates in a few days—one especially from a young lady who has been confined to her from twelve months, with a disease of the head, affecting the brain.

Respectfully yours,

tempectfully yours, E. W. HALL.

On the permancy of the cure hear him. Still another let-er from the above!

BARRELLVILLE, ALLEGANT COUNTY, (Md.,) Cotober 13, 1852.

October 13, 1852.

Dram Sins: I am happy to inform you that this day finds me in the enjoyment of good health, by the use of your Hampton's Tincture and the blessing of God. I am enabled to pursue my daily avocations as usual, and I have a great desire that the afflicted should know the great curative powers of the Tincture.

I am, with respect, yours,

E. W. HALL.

THE ALMOST MIRACULOUS CURES made by Hampton's Vegetable Tincture on our most respectable citi-zens—men well known and tried—we challenge the world to show anything on record in medicine to equal it. Many hundreds who have felt its healing powers bear the same testi-

handreds who have felt its healing powers bear the same testinond.

Mesers. Mortimer & Mowbray: Gents: Last September I was attacked with crysipelas, from which a dreadful ulcer formed on my right leg. Setting better of this, last November I took a deep cold, which led to what my physician told me was billous pleurisy, which left me with a constant, deeply-seated, and painful cough, having no rest day or night, and constantly throwing up from my lungs a thick matter. I became much emaciated, growing weaker every day, and keeping my bed the greater part of the time. My friends thought I had the consumption, and at times I was also of the same opinion. At this stage of my disease, after having, tried many and various remedies, without success, a friend advised me to try DR. HAMPTON'S VEGETABLE TINC-TURE, and procured me a bottle, which I now pronounce the greatest medicine I ever took. Before I had taken half the contents of one bottle I filt much improved; and now, having taken but two bottes, my cough and pains have entirely left me, and I am enabled to attend to business. I can truly say that, with the blessing of God, I have been restored to the health I now enjoy by the use of this most invaluable medicine.

Schroeder, near Saratoga street.

Truth stranger than Fiction !- None need despair !-A Lady's Testimony after thirty-eight years of suffering!

of suffering!

Were there not real virtue in this wonderful medicine, could it perform the astonishing cures made by it!

Notthanvion Co., April 13, 1882.

Messrs. Tylez & Adair: I have been afflicted with Rheumatism, at times, from my twelfth year; I will be fifty years of age the 18th of this month; the attacks were at times so severe as to render me helpless; I have tried various remedies to very little effect. Last October I was attacked in my shoulders, sides, back, and hips; I could not rent, day or night; I could not nove any part of my body without crying with pain; at this time I also tried many remedies, internal and external, without receiving any relief; I was at last advised to try HAMPTON'S VEGETABLE TINCTURE; before I had taken one bottle of which I felt much better, and as I continued taking it I felt strength coming into my back and limbs, and my stomach strengthened and revived every way; I have taken five bottles, and am much better than I ever expected to be. I intend to use it whenever I need it, and would recommend it to the afflicted, believing it unequalled.

Yours,

ELIZABETH BAGWELL. Yours, ELIZABETH BAGWELL.

REV. VERNON ESKRIDGE, U. S. N.

REV. VERNON ESKRIDGE, U. S. N.

Mr. J. E. Bouch—Dear Sir: While I am in general opposed to Patent Medicines, candor compels me to state that
I have great confidence in the virtues of Hampton's Vegetable Tincture. For several months past I have used it in
my family, and in Dyspepsis, loss of appetite, dizziness, and
general debility, with entire success. So far as my experience extends, therefore, I take pleasure in recommending it
to the afflicted as a safe and efficient retailed.

I am, respectfully, yours,

Chaplain in the U. S. Navy.

THE LOST SENSES: DEAFNESS AND BLIND-NESS. By Dr. Kitto.

"This is a work of great interest, from one of the most learned and accomplished writers of the egg, revealing the mysteries of the world in which those live who have been deprived of the sense of sight or hearing. Ever since his boyhood, for more than thirty years, Dr. Kitto has passed a life of great settivity as a zebolar, in a state of the most intense deafness to which any living creature can be subjected. His account of himself, and of his discriminating remarks on the condition of the blind, (James Mitchell, Laura Bridgeman, and others,) are repiete with profound thought on the interesting phenomenon presented in the progress of their mental training."—Christian Observer.

Mechanics, Manufacturers, and Inventors.

THE Eighth Volume of the SCIENTIFIC AMERICAN commences on the 18th of September. It is principally devoted to the diffusion of useful practical knowledge, and is eminently calculated to advance the great interests of industry—Mechanical, Manufacturing and Agricultural—the genius and master-spirit of the nation.

It is unrivalled as a Journal of the Arts and Sciences, and maintains a high character at home and abroad.

The publishers pledge themselves that the future volumes shall at least equal, if not surpass their predecessors. Among the subjects chiefly brought forward and discussed in its columns, are Civit Englacering. Architecture, Railroads, Bridges, Arricultural Implements, Manufactures of Metals, Fibrous and Textile Substances, Machinery for the purpose, Chemical processes, Distilling, Coloring, &c., Steam and Gas Engines, Boilers and Furnaces, Mathematical, Philosophical and Optical Instruments, Cars, Carriagos, Water Wheels, Wind and Grinding Mills' Powers, Planing Machines, Tools for Lumber, Briek Machines Farming, Firs Arms, Electricity, Telegraphs, Surgical Instruments, &c., besides Claims of all Patents, Reviews, Notices of New Inventions, American and Foreign. The work is in form for binding, contains several hundred Engfavings, over four hundred pages of printed matter, and a copious Index. Nearly all the valuable Patents which issue weekly from the Patent Office are fillustrated with Engravings in its columns, thus making the paper a perfect Mechanical Encyclopedia for future as well as present reference.

Valuable Premiums are offered for the largest list of Subscribers to this Volume. It is published weekly by MUNN & CO., at their Patent Agency Office, 128 Fulten street, New York.

TERMS—ALWAYS IN ADVANCE.

KRAUSER'S PATENT CLOVER-SEED HARVESTER

IS REFORE THE PUBLIC FOR THE FIRST TIME
I'S utility is beyond comparison with any other farming
implement now in use. It takes the seed from the field,
leaving the straw or grass all standing. It weighs two hundred and fifty pounds, is drawn by one horse, and gathers
from ten to twelve acres per day. The fingers, or teeth,
catch all the heads, the revolving knives cut them off and
throw them back into the box, which will cross a twentyacre field without emptying. The heads are then loadedinto a wagon and taken directly to the mill for cleaning,
thus diminishing the labor three-fourths, and saving all the
seed. This machine comes so low that every farmer will
have it, and pays the manufacturer 300 per cent.

E. WHEELER, Agent for Washington. KRAUSER'S PATENT CLOVER-SEED HAR-

We, the undersigned, do certify that we have seen Mr. Krauser's Patent Clover Harrester in operation, and it has given perfect satisfaction. It has gathered many of the farmers' clover in this neighborhood—it is all that Mr. Krauser and his bills represent it to be. The farmers have given one-half for gathering and threshing.

JAMES D. TIMESMAN, JOHN F. COOK, WILLIAM F. GARWOOD, JOHN F. COOK, WIN. C. NICHOLSON, JAMES B. COOK, JAMES COLLINS, JAMES R. SEVEN CROSS KEYS, WASHINGTON TOWNSHIP, CAMDEN Co., N. J.,

JOHN F. COOK, JAMES B. COOK, JAMES BRYSON, PETER H. JONES. JAMES COLLINS, CHARLES LEWIS, TROMAS TUMBLESON,

Loss-a-Coming, October 7, 1551.

This is to certify that Mr. G. J. Naylor has gathered clover off of a sixteen-acre field of mine, which has been pastured two months with ten head of cattle, and it produced eix busicle and a half and one peck of seed. I gave him two-thirds for gathering and cleaning. I think his machine is first-rate, and answers all the purpose that is intended.

NEHEMIAH NICHOLSON.

The following rounts out the profitch secture of the

The following points out the profitable asture of the KRAUSER'S PATENT CLOVER-SEED HARVESTER. We have conversed with a number of Farmers, and they are of opinion that there are at least 3,000 acres in each township in Camden or Gloucester county, New Jersey. Admiting there are but 1,000, it is said that each acre will yield from 1½ to 3 bushels. Reducing it to a certainty of yielding but 1 bushel per acre, what will it cost to gather and thresh 1,000 acres?

Threshing 200
Incidental expenses 150

Cost of harvesting, &c., 1,000 acres....

culation.

Perhaps no invention offers greater inducements for a profitable investment than the Harvester. For an enterprising young man, of good business habits, a large sum of money could without doubt be realized from the sale of rights in the different States of the Union not yet disposed of. By calling at this office, it can be demonstrated satisfactly. orily that men of moderate capital could not choose a better or more money-paying business.

Those who wish to see a model of this celebrated farming implement, and the satisfactory manner in which it operates, can do so by calling at

Transition Coal.

Transition Coal.

This rare and valuable Coal is a variety not quite changed into an anthracite, and it has only been discovered (in large quantities) at three places upon our globe, via: at South Wales, Great Britain; at Donett, in Russia, near the Black Sea; and at Dauphin and Lebanon counties, Pennsylvania. In the London market this coal cummands the highest price. It is now mined upon the large estate (43,000 acress) of the Dauphin and Susquehanna Coal Company, situated in Pennsylvania, and it is nearer to the esties of Baltimore and Washington than the coal of any other region. For easy ignition, durability of fire, complete combustion, easy adaptation to the temperature of the weather, and its great power in generating heat, it is the user coal in the world. It has the inflammability of the bituminous coal, with the cleanliness of the anthracite, and a greater durability than either. It burns without making any soot or visible smoke, and the combustion is so complete that it retains the fire until all the coal is consensed. Not so with the anthracites, especially the hard and heavy kinds. They do not burn up, and hence the common troublesome practice of sifting their ashes to obtain more fuel. In burning the Transition Coal there is no waste, for the small coals made by handling, burn as well as ordinary coal. All hould be burned together. If ecreened at all the dust only should be taken out.

A very erroneous impression exists with many persons

taken out.

A very erroneous impression exists with many person that the heaviest coals are the most economical for ordina purposes. This might be the case if coals were rold by me surement, but never when they are sold by waters.

Taylor's valuable work, (Statistics of Coal,) the details a purposes. This bage when they are some surement, but never when they are some at the transfer when they are some at the details are given to show that 31 pounds of a free-burning red ash yielded more heat to a room in 15 hours, than 37 pounds of a heavy white ash coal, making the red ash, at \$5 50, to be more economical than the white ash at \$4 61 per ton. Any person accustomed to use these heavy coals will be astonished at the saving which can be made in burning the lighter kinds, when tested by the weight and burnt in a suitable

person accustomed to use these heavy coals will be astonished at the saving whichean be maste in burning the lighter kinds, when tested by the weight and burnt in a suitable manner.

An apprehension exists with some that the free-burning coals have a tendency to clinker. Now, as a general rule, no coal will clinker unless a greater draught be applied to it than the coal naturally requires. No one would think of applying a bellows constantly to a fire made of seasoned hickory or oak wood, and it would be equally as absurd to apply a blact constantly to a free-burning coal. But the heavy white ash anthracites cannot be burnt without a powerful draft, and without using a larger quantity of coal than the temperature of the weather sometimes requires. Various patterns of stoves, furnaces, cooking ranges, &c., are invented annually to conquer this difficulty, but it has never been done with complete success. In every contrivance, however, which has been invanted to burn coal, the transition variety will make a beautiful fire, and no complaint will ever be made to a manufacturer or selier of grates or stoves when this coal is used. The draft alone is to be regulated by a damper. In introducing this new coal for the first time, prepared as it now is by steam power machinery for domestic use, it may give greater confidence to the buyer to say, that the celebrated free-burning red ash veins in the Pesch Orchard district, near Pottsville, are a continuation of the Duupkin veins, and they approach the nearest in value to the District of Columbia, and it can be obtained at retail

Auphin seins, and they approach the heaves in range he Transition coal.

Shipments of the Transition coal have already been made to the District of Columbia, and it can be obtained at retail rom the following persons:

Win. T. Dove, Washington.

NEW SEVENTH STREET BOOK-STORE

REW SEVENTH STREET BOOK-STORE.

CRAY & BALLANTYNE having secured commodicus of and convenient premises in Seventh street, two doors above Odd-Fallows' Hall, (oppcate the old stand of A Gray), offer a new and beautiful assortment of Religious Books, selected with great care by one of the firm, to which they invite the attention of the Christian public.

They would also respectfully state, that having become the general squarts in this city for the sale of the publications of Rosest Casers & Recentral, and of the Methodistic of the Christian public.

They will also keep a general assortment of the publications of the Presbyterian Board, American Tract Society, American Sunday School Union, &c.

Their assortment of Juvenus Books, and Works suitable for Sunday School Libraries, will be very extensive.

The Depository of the Washington City Bible Society is transferred to their store. Neat Bibles at 25 cents, and Testaments for 6½ cents.

It will be their ambition and pleasure to keep such an assortment of Religions Books as will entirely supply the increasing demand for this kind of literature.

They carnestly solicit the co-operation of Christian friends in the great and important work of widely circulating this class of publications, and thus counteracting, in some degree, the deleterious effects of the light and corrupt reading that is flooding the country to such a fearful extent.

In addition to their extensive assortment of Religious Books, which comprise all the beat standard and miscellaneous works of that class, they will keep constantly on hand a great variety of valuable Historical, Miscellaneous, and Juvenile Works of unexceptionable character; Books of Sacred Music; Hymn Books, such as are used in all the different Churches; Bibles and Prayer Books, in every variety of binding, and at all prices; Albuma, Annuals, and beautiful Gift Books; splendid Family Bibles; and School Books of every kind in use, at the lowest prices.

DENTISTRY.

DR. CASADAVAANT, Surgeon Dentist, formerly from Paris and New York, returns his 4 neere thanks to the citizens of Washington and Georgetown and vicinities for the liberal patronage which they have extended to 1 m since he has established himself in this city, and would inform them that he has removed to Lane & Tucker's brilling, on Pennsylvania avenue, between the National Hotel and 4½ street, where he still continues to perform all operations in his profession in a superior manner, at New York prices, so as to enable all to test his skill, and he warrants his work to be equal to that of the best Dentists. As he manufactures his own artificial teeth, he is enabled to suit all cases, and will undertake to perform all those operations in which other Dentists have falled to succeed. He will refer to many citizens of Washington and Georgetown, for whom he has performed operations.

Protection from Lightning.

Protection from Lightning.

THE undersigned, being the duly appointed Agent of Sprant's Electrican and Electro-Metallunous Lightning. Sprant's Electrican and Electro-Metallunous Lightning. Sprant's Electrican and Electro-Positive deferthese superior Rods, of Spiralt-wisted, Carbonized Annealed Iron, with Zinc Protectors, and Electro-positive elements combined in their manufacture; thus rondering them equal to copper as conductors. They are in ten-feet lengths, with accurately-fitted brass-screw connecting joints, an entire new style of metallic (patented) attachments, for brick or frame buildings; also, glass isolaters, of a novel and ingenious construction, (patented.) forming a lock; the whole mounted with a solid platinum silver point, (patented.) twelve inches long, surrounded at the base with three angular negative magnets, which possess the power, to an extraordinary extent, of discharging the opposite elements of the most fearful thunderstorm, and embrace the entire perfection of science up to the present time; the whole constituting the most magnificent and perfect silent conductor ever presented to the public.

Safety has not been compromised by affording these excellent rods at such low rates; the greatest attention has been given to their construction, so as to be readily attached. The astonishing power of the negative magnets, in discharging the air of its opposite elements, has been clearly demonstrated by the Electrometer, when unmagnetized points have shown but slight results, though placed under the same conditions. In fact, they gather and silently discharge electricity from the atmosphere when you would scarrely suspect any being present.

These improvements being secured by double letters patent, you are hereby cautioned against laying yourselves liable, by purchasing of those who are not authorized, or who are substituting inferior imitations. All agents duly appointed can show their certificates. Have good rods or none.

CHARLES W. HEYDON,
Washington City.

I do hereby cartify that I have applied various powerful themical re-agents to Spratt's Patent Points for Lightning-Rods, and that the results of these experiments convince me that they will resist the action of atmospheric causes, and thereby preserve the extremity sharp—acondition most essential to protection against lightning. The re-agents used in the above experiments were a solution of chloride of so dium, (common salt,) acette acid, sulphuric acid, and hydrechloric acid. With the first, there was no action on the motal; with the several acids, there was no action on the motal; with the several acids, there was ray slight—a fact sufficient to show that atmospheric influences would have no sensible effect.

JOHN LECONTE, Prof. of Nat. Phil. et Chem.
UNIVERSITY OF GA., October 8, 1850.

The Lightning Conductors of Mr. Sprait, offered to me.

University of GA., October 8, 1850.

The Lightning Conductors of Mr. Sprait, offered to me, are well calculated to perform the office for which they are intended. Yours, truly, Prof. ROBT. PETER. Lexinoton, Kr., February 20, 1850.

Christo, September 3, 1850.

This may certify that I have examined, somewhat critically, James Sprait's Patent Lightning Rods, and that I am of opinion that it is constructed on scientific principles. For combining durability, cheapness, and efficacy, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

Around A. (GA.) November 11, 1850.

equal, and I think superior, to any other rod ever offered for my inspection.

AUGUSTA, (G.) NOVEMBER 11, 1850.

This will certify that I have examined the Lightning Rods, Metallic Points, and Isolating Attachments, manufactured by Mr. Spratt, and regard them as constructed in conformity to the general laws of the electric fluid; and the installic compound constituting the Points, as promising, from the result of several tests to which they were submitted, to resist for years the action of those atmospheric causes most likely to corrode them.

A. MEANS, Prof. Phys. Sc., Emory College, Ga., and Prof. Chem. and Pharm., Modical College, Ga.

The Lightning Conductors put up by Mr. Henry M. Smith, of this city, on the plan of Mr. Spratt, appear to me to be very well devised; and, in point of mechanical construction, are the best 1 have ever seen.
